

DeVilbiss Advance Spray Gun For Ceramic Spray.

DeVilbiss have introduced a new gun specifically designed for Ceramic finishing. The Advance gun range is available with specially hardened or tungsten carbide fluid nozzles and needles to provide the longest life possible in the ceramics industry. The guns also feature an all new needle packing design that also withstands the abrasive fluids used in the ceramic industry. Stainless Steel fluid passageways and a wide range of nozzles provide total compatibility for the Ceramics industry.

- Light weight Gun – fits in the hand for all day comfort
- Tungsten Carbide & Hardened nozzles and Needles
- Unique ceramic needle packing – for long working life
- Stainless Steel fluid passages – perfect for ceramic coatings
- Wide range of plated brass air caps for all material types
- Forged aluminium gun body for rugged long life
- Renowned DeVilbiss atomisation

The New design ceramic needle packing prevents glaze and ceramic materials from abrading the gun needle, this feature dramatically extends the needle AND packing life expectancy.

DeVilbiss Viper Auto Spray Gun for Ceramic Spray.

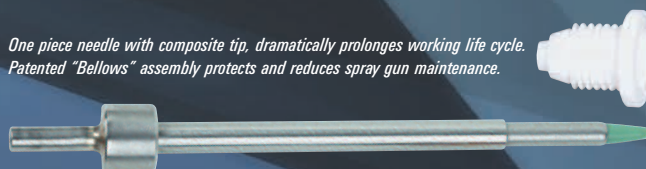

The DeVilbiss VIPER is purpose made for the tough working conditions in the Glaze & Ceramics

industries. The Patented "Quick Up" system provides fast & easy disassembly of the Air Cap and Fluid Tip, this dramatically reduces production downtime. The working parts of the Gun can be completely stripped in seconds without the use of Tools. The Patented "Bellows" system protects the Needle and needle packing which extends the spray gun operating life in the difficult conditions found in the Ceramic industry. Stainless Steel fluid passageways and a wide range of hardened nozzles provide total compatibility for Ceramic applications.

- Easy and fast cleaning is provided by the unique and instant 1/4 turn air cap and fluid tip removal system ("Quick Up" patent).
- Trans-Tech and Conventional air cap range for higher transfer efficiency and durability.
- Exceptional finishing quality.
- Long life with extended serviceability.
- Wide range of Stainless Steel (hardened) fluid tips for all Glaze and Ceramic applications.

One piece needle with composite tip, dramatically prolongs working life cycle. Patented "Bellows" assembly protects and reduces spray gun maintenance.
